REQUEST FOR STATEMENT OF QUALIFICATIONS

PROFESSIONAL SERVICES TO MANAGE REMOVAL OF INVASIVE EXOTIC PLANT SPECIES ON THE FLORIDA KEYS SCENIC HIGHWAY RIGHT-OF-WAY

Introduction

The Growth Management Division of Monroe County, Florida invites firms to submit proposals to monitor and undertake removal of Florida Exotic Pest Plant Council-listed species (see FLEPPC.org, or contact Monroe County Growth Management Division for a list) within the Florida Keys Overseas Heritage Trail and Florida Keys Scenic Highway right-of-way. The Corridor Management Plan for the Scenic Highway requires protection and preservation of natural resources along the corridor, including development of a Vegetation Management Plan. The plan's first step is removing invasive exotic plants on the rights-of-way. The goal of this project is to allow natives to re-colonize, reduce maintenance costs, open scenic viewsheds and prevent the spread of invasive species by ROW maintenance activities such as mowing.

Background

The Florida Keys Scenic Highway is a 106.5-mile corridor connecting the various island communities that make up the Florida Keys. Many public and private conservation landowners in the Florida Keys have been successful in removing invasive exotic species from their land. This project expands work done throughout the Keys along the Scenic Highway right-of-way. Following completion of the invasive exotic plant removal on the right-of-way, the Scenic Highway Advisory Group will be working with private landowners along the right-of-way to reduce seed sources on private lands.

A Corridor Advisory Group provided the forum for public and governmental participation and offered guidance in developing the corridor vision and management plan that resulted in State Scenic Highway designation in June 2001. Since designation, corridor management has been the responsibility of the State Scenic Highway Advisory Group, 25 members representing public and private entities and stakeholders along the island chain. The participation is diverse and includes: the municipalities along the route—the City of Key West, the City of Marathon, the City of Key Colony Beach, the City of Layton, and Islamorada, Village of Islands; Monroe County; Florida Department of Transportation; Florida Department of Environmental Protection; Florida Keys Council on the Arts; Monroe County Tourist Development Council; Monroe County Historic Preservation Society; Clean Florida Keys, Inc. and representatives from the five Chambers of Commerce.

Project Location

The project is located entirely within the bounds of the Florida Department of Transportation's (FDOT) US Highway 1 right-of-way (ROW) and associated properties (i.e. bridge abutments and other FDOT-owned properties). The section of ROW covered by this project runs from the western end of Stock Island at MM 4 to MM 106.5 on Key Largo. The property is owned by the State of Florida and is managed by the FDOT.

Scope of Services

The project consists of conducting an initial survey of infestation, and pulling or cutting all Florida Exotic Pest Plant Council (FLEPPC)-listed species occurring singly or in groups within the ROW and associated properties, followed by herbicide application, and chipping and disposal of all resulting biomass. The professional services firm will manage the project including the scheduling, subcontracting as necessary, labor, monitoring and reporting progress. The success of the project depends on the thoroughness of invasive exotic removal.

Typically, the ROW includes mowed and unmowed vegetation, ranging from grasses to large trees, on either side of the highway. Bridge abutments vary in their dimensions but are all part of the project. Every stretch of ROW has different species of concern but Brazilian pepper, Australian pine, Asiatic Colubrina, Lead Tree, Seaside Mahoe and non-native Scaevola are the most abundant.

Every exotic species listed by Florida EPPC will be either hand-pulled or cut down and treated with appropriate herbicide. Every effort shall be made to avoid damage to native vegetation or wildlife. The consultant is responsible for the initial treatment and removal of all the specified exotic species including trees, shrubs, vines, herbaceous plants and grasses regardless of the size or reproductive state of the plant.

Each cut plant will be cut as low to the ground as possible. A dye shall be used to facilitate identification of treated stems. Cuts will be made level to the ground to minimize herbicide runoff prior to absorption. The herbicide will be applied using a low-pressure spray to minimize drift and non-target damage. Within one (1) minute of stump preparation an appropriate herbicide will be applied.

All lead tree (*Leucaena leucocephala*) seeds will be hand cut, bagged and disposed of at the nearest transfer station. Transfer station receipts will be provided with reports as proof of compliance with this requirement.

The consultant will provide all materials for treatment (including herbicide and adjuvants) and ensure proper disposal of herbicide and adjuvant containers and will strictly adhere to all herbicide label application, precautionary, and safety statements.

All herbicide treatments shall be at least 95% effective in preventing re-sprout of treated plants. If 95% kill rate is not achieved for any area of the project after two (2) months past initial project completion; one additional treatment of the exotic plants in the problem area will be the responsibility of the contractor.

Additional plant treatment or removal and nonplant debris removal may be added to the project by mutual agreement as field conditions warrant and funds permit. Such agreements for additional work shall be made in writing and agreed to by signature of both parties.

While notice to proceed will be issued as soon as possible after the contract is final, the project timeframe may be adjusted depending on seasonal conditions.

Prospective bidders must be herbicide applicators, certified by the Florida Department of Agricultural and Consumer Services, and in good standing with that Department. The County reserves the right to disqualify prospective bidders who have violations of the Rules of Chapter 62C-20, F.A.C., or other state or federal laws or regulations related to pesticide use or aquatic plant control resolved by mediation, Consent Order, or fine within the two (2) previous years.

WAIVER OF INSURANCE REQUIREMENTS

There will be times when it will be necessary, or in the best interest of the County, to deviate from the standard insurance requirements specified within this manual. Recognizing this potential, and acting on the advice of the County Attorney, the Board of County Commissioners has granted authorization to Risk Management to waive and modify various insurance provisions.

Specifically excluded from this authorization is the right to waive:

- **The County as being named as an Additional Insured**—If a letter from the Insurance Company (not the Agent) is presented, stating that they are unable or unwilling to name the County as an Additional Insured, Risk Management has been granted the authority to waive this provision.

and

- **The Indemnification and Hold Harmless provisions**

Waiving of insurance provisions could expose the County to economic loss. For this reason, every attempt should be made to obtain the standard insurance requirements. If a waiver or a modification is desired, a **Request for Waiver of Insurance Requirements** form should be completed and submitted for consideration with the proposal.

After consideration by Risk Management and if approved, the form will be returned, to the County Attorney who will submit the Waiver with the other contract documents for execution by the Clerk of the Courts.

Should Risk Management deny the Waiver Request, the other party may file an appeal with the County Administrator or the Board of County Commissioners, who retains the final decision-making authority.
